

Digitech ImageSilo

Demo Account FAQ

--Cranel Internal Use--

What is the demo account program?

The demo account program provides up to 3 GB of ImageSilo for a reseller's internal use and is billed on the tiered schedule outlined in the contract. It can be used for internal training and demonstration purposes and should be viewed as the SaaS equivalent of a PaperVision Enterprise NFR License.

Who can access the demo account?

The demo account can be accessed by reseller employees only. The reseller cannot add any end user entities.

How long is the demo account active?

The demo account is prepaid for 12 months and renews automatically on an annual basis. As soon as the reseller onboards a customer, the billing will automatically roll to a production account that follows the production billing schedule. The demo account is non-refundable, non-returnable, and can be cancelled at any time.

Where should I access the demo account?

The demo account can be accessed at the same location as a production account, namely <https://login.imagesilo.com/PVE.aspx>.

What is the purpose of the demo account?

The demo account program provides the reseller with a minimal cost of entry to ImageSilo while maximizing exposure to the software and supporting marketing efforts. In addition, the program front loads the paperwork process, which in turn ensures a seamless onboarding experience for the reseller's first end user. Since the reseller has a contract with Cranel, they are then enabled to present a formal contract to each end user prospect.
